

ANISCA JHA

Bhayandar, Maharashtra, India — aniscajha@gmail.com — +91 8450927519 — LinkedIn

PROFESSIONAL SUMMARY

AI/ML-focused Computer Engineering student with **8.06 CGPA**, delivering **3 internships and 5+ projects** in **Machine Learning, Deep Learning, and Computer Vision**. Engineered scalable **ML pipelines**, implemented **CNN architectures (1D, 2D, 3D)**, and analyzed **Hyperspectral Dataset (Salinas)**. Proficient in **Python, TensorFlow, Keras, and scikit-learn** for model training, evaluation, and performance optimization.

TECHNICAL SKILLS

Programming: Python, C++, SQL, JavaScript, C#

AI/ML & Deep Learning: TensorFlow, Keras, PyTorch (basic), scikit-learn, OpenCV, CNN, Neural Networks

Data Science: NumPy, pandas, Matplotlib, EDA, Feature Engineering, Model Evaluation, Hyperparameter Tuning

Development: HTML, CSS, Git, GitHub, Fast APIs, Judge0 API, GROQ API, Unity (AR/VR), SupaBase

Tools: Jupyter Notebook, Google Colab, VS Code

EDUCATION

Bachelor of Engineering (Computer Engineering)

Aug 2023 – May 2027

Vidyavardhini's College of Engineering and Technology, Mumbai

CGPA: 8.06 (Up to Semester 5)

EXPERIENCE

Data Science Intern, Oasis Infobyte

Dec 2025 – Jan 2026

- Built and validated **machine learning models** for classification and regression using Python and scikit-learn
- Orchestrated **end-to-end ML pipelines** including preprocessing, feature engineering, and performance tuning

Python Programming Intern, CodSoft

Jun 2025

- Engineered Python applications leveraging **OOP principles, APIs, and automation workflows**
- Improved execution efficiency through optimized and modular code design

Web Development Intern, OctaNet Services Pvt Ltd.

Jan 2025 – Feb 2025

- Crafted responsive web interfaces using HTML, CSS, and JavaScript with backend integration
- Strengthened UI responsiveness and cross-browser compatibility for production use

PROJECTS

DSalytics (Ongoing) – AI-driven Analytics Platform

- Architected backend using **Supabase** for secure authentication and scalable database operations

Multispectral & Hyperspectral Land Cover Classification

- Designed and trained **Deep Learning models (1D, 2D, 3D CNN)** on the Salinas dataset for land cover classification
- Achieved **91% classification accuracy** using the **S2-LandNet architecture**, enhancing model generalization on hyperspectral data

Shoot Verse (AR/VR)

- Developed an immersive **AR/VR fruit shooter game** using **Unity and C#**, enabling real-time interaction and physics-based gameplay

Dine360

- Implemented backend using **PHPMyAdmin and MySQL** with efficient CRUD operations

LEADERSHIP

Deputy Technical Head – E-Cell VCET

CERTIFICATIONS

- AWS Solutions Architecture Job Simulation
- Tata GenAI Powered Data Analytics Simulation
- Deloitte Data Analytics Job Simulation
- Accenture Introduction to Technology Apprenticeship Job Simulation
- LLM for Young Developers – Foundational Course
